History of Water Series

Series Editor: Terje Tvedt.

As concerns over global water resources continue to grow, the pioneering *History of Water* series brings a much needed historical perspective to the relationship between water and society. Covering all aspects of water and society—social, cultural, political, religious and technological—the volumes reveal how water issues can only be fully understood when all aspects are properly integrated. Unprecedented in its geographical coverage and unrivalled in its multidisciplinary span, the *History of Water* series makes a unique and original contribution to a key contemporary issue.
